Objective and Introduction

- Prospective junior web developer that is currently looking for valuable experience in the web development/mobile development fields. I am eager to learn and to work hands on with whatever technology the task at hand requires, even if that means figuring it out on my own until I'm competent.

Skill and Highlights

- HTML, CSS, JavaScript, jQuery, Bootstrap
- Java
- Git, Bash
- Have had exposure to Node.js and NPM
- Have had exposure to C++, PHP
- Have had exposure Android and Android Studio

Working Experience

Undergraduate Employee - Illinois State WEB - *June 2017 to Now*

- Responsible for tasks like organizing university web forms, editing minor components of the ISU website via their content management system, and other tasks like office equipment inventory. Work with both the dev and content teams.

IT Intern - G&W Electric - *May 2016 to Aug 2016*

- Worked with IT department on various projects relating to computer infrastructure. Completed my first HTML/CSS/JS project which was an intranet video player called G&W I-Tube.

Front of House Team Member - Chick-fil-A - *Aug 2017 to Now*

- Duties include manning the front counter registers, handling dining room responsibilities, and drive-through. Interact with customers frequently and work in a very hectic environment.

Maintaining Engineering Intern - G&W Electric - *May 2015 to Aug 2015*

- Revised company technical drawings using CAD as well other projects relating to improving existing products.
